

CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in Canadian Dollars)

FOR THE PERIOD ENDED September 30, 2024

NOTICE OF NO AUDITOR REVIEW OF CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

Under National Instrument 51-102, Part 4, subsection 4.3 (3) (a), if an auditor has not performed a review of the condensed consolidated interim financial statements, they must be accompanied by a notice indicating that an auditor has not reviewed the financial statements.

The accompanying unaudited condensed consolidated interim financial statements of the Company have been prepared by and are the responsibility of the Company's management.

The Company's independent auditor has not performed a review of these financial statements in accordance with standards established by the Chartered Professional Accountants of Canada for a review of interim financial statements by an entity's auditor.

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Expressed in Canadian Dollars)

September 30, 2024

1. NATURE OF OPERATIONS

Lion One Metals Limited ("Lion One" or the "Company") was incorporated on November 12, 1996 under the laws of the Province of British Columbia, Canada. The Company is in the business of mineral exploration and evaluation and is currently focused on the development of mineral resources in Fiji. The Company is listed for trading on the TSX Venture Exchange ("TSX-V") under the symbol LIO and on the Australian Securities Exchange ("ASX") under the symbol LLO. The Company's head office and principal address is 306 - 267 West Esplanade, North Vancouver, BC, Canada, V7M 1A5. The address of the Company's registered and records office is Suite 1700 – 1055 West Hastings Street, Vancouver, BC, V6E 2E9.

The Company's condensed interim consolidated financial statements are presented in Canadian dollars.

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The Company has incurred losses from inception and has not advanced its properties to commercial production. The Company estimates that it has adequate financial resources for the next twelve months with working capital of \$26,747,147. The Company's continuation as a going concern is dependent upon the successful results from its exploration activities and its ability to attain profitable operations and generate funds therefrom and/or raise equity capital or borrowings sufficient to meet current and future obligations.

There are many external factors that can adversely affect general workforces, economies and financial markets globally. It is not possible for the Company to predict the duration or magnitude of adverse results of such external factors and their effect on the Company's business or ability to raise funds.

The condensed interim consolidated financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations. Continued operations of the Company are dependent on the Company's ability to receive financial support, obtain necessary financings, and/or generate profitable operations in the future.

2. BASIS OF PREPARATION

Statement of Compliance

These condensed interim consolidated financial statements, including comparatives, have been prepared in accordance with International Accounting Standards ("IAS") 34 'Interim Financial Reporting' ("IAS 34") using accounting policies consistent with IFRS issued by the International Accounting Standards Board ("IASB") and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). The accounting policies and methods of computation applied by the Company in these condensed interim consolidated financial statements are the same as those applied in the Company's annual financial statements for the year ended June 30, 2024.

The condensed interim consolidated financial statements have been prepared on a historical cost basis except for certain financial assets measured at fair value. All dollar amounts presented are in Canadian dollars unless otherwise specified.

These condensed interim consolidated financial statements incorporate the financial statements of the Company and its wholly controlled subsidiaries. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The condensed interim consolidated financial statements include the accounts of the Company and its direct wholly-owned subsidiaries. All significant intercompany transactions and balances have been eliminated.

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Expressed in Canadian Dollars)

September 30, 2024

2. BASIS OF PREPARATION (cont'd...)

Basis of Consolidation and Presentation

Use of Estimates

The preparation of these condensed interim consolidated financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported expenses during the period. Actual results could differ from these estimates.

Judgments

The functional currency of each of the subsidiaries and the Company were assessed to determine the economic substance of the currency in which each entity performed its operations. The functional currency of the Company is the Canadian dollar. The functional currencies of the Company's subsidiaries have been assessed as follows:

	Country of		
	Incorporation	Effective Interest	Functional currency
American Eagle Resources Inc.	Canada	100%	Canadian Dollar
Laimes International Inc.	BVI	100%	Canadian Dollar
Auksas Inc.	BVI	100%	Canadian Dollar
Lion One Pte Limited	Fiji	100%	Fijian Dollar
Lion One Australia Pty Ltd.	Australia	100%	Australian Dollar
Piche Resources Pty Ltd.	Australia	100%	Australian Dollar

Estimates

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, are as follows:

The carrying value and recoverability of exploration and evaluation assets and mineral property, plant and equipment requires management to make certain estimates, judgments and assumptions about its project. Management considers the economics of the project, including the latest resource prices and the long-term forecasts, and the overall economic viability of the project.

The determination of income tax is inherently complex and requires making certain estimates and assumptions about future events. While income tax filings are subject to audits and reassessments, the Company has adequately provided for all income tax obligations. However, changes in facts and circumstances as a result of income tax audits, reassessments, jurisprudence and any new legislation may result in an increase or decrease in the Company's provision for income taxes.

Share-based payments are subject to estimation of the value of the award at the date of grant using pricing models such as the Black-Scholes option valuation model. The option valuation model requires the input of highly subjective assumptions including the expected share price volatility. Where such valuations are applied, such as the time of a stock option grant or issuance of shares from trust, management provides detailed valuation assumptions.

Stockpiled mineralized materials, work-in-process, and finished goods are measured at the lower of weighted average cost or net realizable value ("NRV"). The assumptions used in the valuation of work-in process inventory include estimates of the amount of gold and silver in the mill circuits and assumptions of the gold and silver prices expected to be realized when the metals are recovered. If these estimates or assumptions prove to be inaccurate, the Company could be required to write-down the recorded value of its work-in-process inventory, which would reduce the Company's earnings.

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Expressed in Canadian Dollars)

September 30, 2024

3. MATERIAL ACCOUNTING POLICIES

During the three months ended September 30, 2023, the Company expanded its material accounting policy on mineral property in development phase and mineral property in production phase as follows:

Mineral property - development phase

Once the technical feasibility and commercial viability of an exploration property has been determined, it is then considered to be a mine under development and is reclassified to mineral property. The carrying value of capitalized exploration and evaluation costs are tested for impairment before they are transferred to mineral property. All costs relating to the construction, installation, or completion of a mine that are incurred subsequent to the exploration and evaluation stage are capitalized to mineral property. The Company assesses the stage of each mine under development to determine when a property reaches the stage when it is in the condition for it to be capable of operating in a manner intended by management ("commercial production"). Determining when a mine has achieved commercial production is a matter of judgement.

Depending on the specific facts and circumstances, the following factors may indicate that commercial production has commenced:

- all major capital expenditures to bring the mine to the condition necessary for it to be capable of operating in the manner intended by management have been completed;
- the completion of a reasonable period of testing of the mine plant and equipment;
- the ability to produce saleable product;
- the mine or mill has reached a predetermined percentage of design capacity;
- mineral recoveries are at or near the expected production level; and
- the ability to sustain ongoing production of mineralized materials (i.e., the ability to continue to produce mineralized materials at a steady or increasing level).

Proceeds before intended use

Revenue from the sale of gold and silver ounces recovered before items of mineral property, plant, and equipment, such as the mine or process plant, are operating in the manner intended by management are recognized, along with related costs, in the consolidated statement of loss and comprehensive loss.

IAS 16, Property, Plant and Equipment - Proceeds Before Intended Use (effective for annual periods beginning on or after January 1, 2022). The amendment prohibits deducting from the cost of property, plant and equipment amounts received from selling items produced while preparing the asset for its intended use. Instead, a company will recognize such sale proceeds and related cost in profit or loss.

Mineral property - production phase

When management determines that a property is capable of commercial production, amortization of costs capitalized during development begins. Once a mineral property has been brought into commercial production, the costs of any additional work on that property are expensed as incurred, except for exploration and development programs which constitute a betterment, which will be deferred and amortized over the remaining useful life of the related assets. Mineral properties include decommissioning and restoration costs related to the reclamation of mineral properties. Mineral properties are derecognized upon disposal, or impaired when no future economic benefits are expected to arise from continued use of the asset or the carrying value of the cash generating unit exceeds its recoverable amount. Any gain or loss on disposal of the asset, determined as the difference between the proceeds received and the carrying amount of the asset is recognized in the statement of loss and comprehensive loss.

Mineral properties are amortized on the unit-of-production basis using the mineable ounces extracted from the mine in the period as a percentage of the total mineable ounces to be extracted in current and future periods based on mineral resources. Mineral properties are recorded at cost, net of accumulated depreciation and depletion and accumulated impairment losses and are not intended to represent future values. Recovery of capitalized costs is dependent on successful development of economic mining operations or the disposition of the related mineral property.

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Expressed in Canadian Dollars)

September 30, 2024

3. MATERIAL ACCOUNTING POLICIES (cont'd...)

Impairment of non-current assets

Non-current assets are tested for impairment when indicators of impairment are present. Calculating the estimated fair values of cash generating units for non-current asset impairment tests requires management to make estimates and assumptions with respect to future gold prices; future capital cost estimates; operating cost estimates; estimated mineral resources; and, the discount rate. Reductions in metal price forecasts; increases in estimated future costs of production; increases in estimated future non-expansionary capital expenditures; reductions in the amount of recoverable resources, and exploration potential; and/or adverse current economics can result in a write-down of the carrying amounts of the Company's non-current assets (*Note 5*).

The application of the Company's accounting policy for mineral property development costs required judgement to determine when the Tuvatu Project Project's technical feasibility and commercial viability had been demonstrated. The Company considered the approval of the Company's Board of Directors to start the detailed engineering, procurement, and construction of the 500 tonne per day Tuvatu Project process plant, along with the substantial amount of work that had been completed on the 300 tonne per day pilot plant to date, and concluded that the technical feasibility and commercial viability had been achieved. Accordingly, effective September 30, 2023, the Company reclassified capitalized costs from exploration and evaluation assets to mineral property and tested for impairment. Concurrent with the development decision, the Company completed an impairment test of the Tuvatu Project which compared the carrying value to the recoverable amount. Based on the result of the impairment test, the Company concluded that there was no impairment.

Property and equipment

Property and equipment is carried at cost less accumulated depreciation and accumulated impairment losses. Depreciation is recognized when the asset is available for its intended use, using the straight-line method at the following annual rates and Units of Production method ('UOP'):

12.5% - 25% / UOP
UOP
12.5% - 25%
12.5% - 100%
18%
2.5% - 25%

Depreciation of property and equipment related to exploration and evaluation activities is capitalized in exploration and evaluation costs. Depreciation related to general administration is expensed in office costs.

Inventories

Inventories include stockpiled mineralized materials, work-in-process, materials and supplies, and finished goods, and are measured at the lower of weighted average cost or net realizable value ("NRV"). For work-in-process and finished goods inventories, cost includes all direct costs incurred in production, including direct labour and materials, depreciation and depletion, and directly attributable overhead costs. NRV is calculated as the estimated price at the time of sale based on prevailing metal prices less estimated future costs to convert the inventories into saleable form, transportation costs, and estimated costs to sell.

Stockpiled mineralized materials represents mineralized materials that has been extracted from the mine and is available for further processing. Costs added to stockpiled mineralized materials inventory is based on current mining cost per ounce incurred up to the point of stockpiling the mineralized materials and are removed at the weighted average cost per ounce. Costs are included in work-in-process inventory based on current costs incurred up to the point prior to the refining process, including applicable depletion of mining interests, and removed at the weighted average cost per recoverable ounce of silver equivalent.

The average costs of finished goods represent the average costs of work-in-process inventory incurred prior to the refining process, plus applicable refining and transportation costs.

Work-in-process inventory includes inventory in the milling process, in tanks, and precipitates. Finished goods inventory includes metals in their final stage of production prior to sale, primarily doré at the mine site or in transit, and refined metal held at a refinery.

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Expressed in Canadian Dollars)

September 30, 2024

3. MATERIAL ACCOUNTING POLICIES (cont'd...)

Any write-downs of inventories to NRV are recorded as cost of sales. If there is a subsequent increase in the value of inventories, the previous write-downs to NRV are reversed to the extent that the related inventories have not been sold. Materials and supplies are measured at weighted average cost. Cost includes acquisition, freight, and other directly attributable costs. In the event that the NRV of the finished goods, the production of which the materials and supplies are held for use in, is lower than the expected cost of the finished product, the material and supplies are written down to their NRV.

Revenue recognition

The Company adopted the Amendments to *IAS 16 "Property, Plant, and Equipment"* during the perid ended September 30, 2024, pursuant to which proceeds from sales occurring before the Tuvatu Gold Project is operating in the manner intended by management should be recognized in the consolidated statement of loss and comprehensive loss, together with the costs of producing those items. The Company measured the costs of production, while the Tuvatu Mine was in commissioning, in accordance with *IAS 2 "Inventories"*.

The Company's primary source of revenue is the sale of refined gold and silver and its performance obligations are the delivery of refined gold and silver to its customer.

Revenue from the sale of metal is recognized when the buyer obtains control of the metal. When considering whether the Company has satisfied its performance obligations, it considers the indicators of the transfer of control, which include, but are not limited to, whether: the Company has a present right to payment; the customer has legal title to the metal; the Company has transferred physical possession of the metal to the customer; and, the customer has the significant risks and rewards of ownership of the metal. Revenue is recognized at the time when the risks and rewards of ownership and title transfers to the customer, which is when the Company irrevocably instructs the refinery to deliver the metals to the customer.

New accounting standards issued but not yet effective

Amendments to IAS 1. Presentation of Financial Statements

In January 2020, the International Accounting Standards Board ("IASB") issued "Classification of Liabilities as Current or Non-current (Amendments to IAS 1)". The amendments clarify that the classification of liabilities as current or non-current should be based on rights that exist at the end of the reporting period. The amendments also clarify the definition of a settlement and provide situations that would be considered as a settlement of a liability. In October 2022, the IASB issued "Non-current Liabilities with Covenants (Amendments to IAS 1)". These further amendments clarify how to address the effects on classification and disclosure of covenants that an entity is required to comply with on or before the reporting date and covenants that an entity must comply with only after the reporting date. The amendments are effective for reporting periods beginning on or after January 1, 2024. The Company has not yet determined the impact that these amendments will have on the condensed interim consolidated financial statements.

4. SHORT TERM INVESTMENT

The short-term investment is comprised of guaranteed investment certificates issued by the Company's banking institutions.

5. MINERAL PROPERTY, PLANT AND EQUIPMENT (cont'd...)

Tuvatu Gold Project

The Company's primary asset is the Tuvatu Gold Project located near Nadi on the island of Viti Levu, Fiji.

In January 2015, the Mineral Resources Department ("MRD") of Fiji granted Special Mining Lease 62 ("SML 62") on the Tuvatu project to the Company. SML 62 is a designated area within the original boundaries of the Company's Special Prospecting Licenses ("SPL's") 1283 and 1296. SML 62 provides exclusive rights for the potential development, construction, and operation of mining, processing, and waste management infrastructure at Tuvatu. The terms of the mining lease provide for certain performance and reporting requirements. The SML has been granted for a term of ten years provided the Company complies with the terms of the lease. Extensions to the term can be applied subject to the terms of the lease and the Mining Act. In August 2022, SML 62 was extended for an additional 10 year term renewable to February 28, 2035. A performance and environmental bond of FJD\$2,634,795 (\$1,621,679) (June 30, 2024 - FJD \$2,634,795 (\$1,559,210) has been placed on deposit with the MRD. The SML is subject to annual lease payments of FJD\$73,697 (\$45,360).

The Fiji properties are subject to a perpetual production royalty of 0.5% to 1.5% of net smelter returns. This NSR is payable to Laimes Global Inc., a company controlled by Walter Berukoff, CEO and director of the Company. In addition, SML 62 is subject to a step royalty payable to the government of Fiji starting at 0% in 2023, 0.5% in 2024, 1.1% in 2025, 2% in 2026, 3% in 2027 and 5% then onwards.

Surface Lease Agreement

The Company holds a 21-year Surface Lease agreement with the iTaueki Land Trust Board ("TLTB") which governs the native land ownership rights in Fiji. The TLTB manages the lease agreements between native land owners and tenants. Under the terms of the Surface Lease, the Company must make a one-time payment of FJD\$1,000,000 of which FJD\$700,000 (\$430,840) was paid upon acceptance of the Surface Lease agreement. In March 2019, the Company paid FJD\$249,497 (\$153,562) to the TLTB with FJD\$50,503 (\$31,084) remaining is due upon the first gold production from mining operations in Tuvatu. An additional lease payment of FJD\$30,000 (\$18,465) is payable per annum to the local communities for education and community development over the 21-year term of the Surface Lease agreement.

The application of the Company's accounting policy for mineral property development costs required judgement to determine when the Tuvatu Project Project's technical feasibility and commercial viability had been demonstrated. The Company considered the approval of the Company's Board of Directors to start the detailed engineering, procurement, and construction of the 500 tonne per day Tuvatu Project process plant, along with the substantial amount of work that had been completed on the 300 tonne per day pilot plant to date, and concluded that the technical feasibility and commercial viability had been achieved. Accordingly, effective September 30, 2023, the Company reclassified capitalized costs from exploration and evaluation assets to mineral property and tested for impairment. Concurrent with the development decision, the Company completed an impairment test of the Tuvatu Project which compared the carrying value to the recoverable amount. Based on the result of the impairment test, the Company concluded that there was no impairment.

Fiji Exploration Properties

The Company holds four exploration licenses (SPL's) for the Tuvatu properties as granted by the MRD. Under the terms of the SPL's, the Company is required to spend a minimum threshold of expenditures on each of the licenses. In May 2024, the Company submitted the SPL1512 renewal application in accordance with statutory requirements and renewal is pending.

SPL	Issued	Expiry Date	Bond (Fijian \$)	Bond (Canadian \$)	Expenditure Requirement (Fijian \$)	Expenditure Requirement (Canadian \$)
1283	Aug. 24, 2020	Aug. 23, 2025	158,180	97,358	1,400,000	861,680
1296	Aug. 24, 2020	Aug. 23, 2025	158,180	97,358	1,600,000	984,778
1465	Mar. 5, 2022	Mar. 4, 2025	67,979	41,840	679,789	418,401
1512	May 14, 2019	May 13, 2024	633,223	389,740	15,333,305	9,437,435

The Company is in the process of renewing SPL 1512.

Deposits

As at September 30, 2024, the Company paid \$257,912 other deposits in Fiji (June 30, 2024 - \$228,278).

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Expressed in Canadian Dollars)

September 30, 2024

5. MINERAL PROPERTY, PLANT AND EQUIPMENT (cont'd...)

Bonds

The SPL's require the posting of bonds as security against future reclamation obligations. As at September 30, 2024, the Company has bonds of \$2,247,975 (June 30, 2024 - \$2,216,827) held with the MRD pursuant to SML62 and the SPL's and an environmental bond \$40,133 (June 30, 2024 – \$39,577) held with the Ministry of Environment. These are recorded as Deposits on the statements of financial position.

6. INVENTORY

The Company's inventory comprised of the following:

	Se	June 30, 2024

Total inventory	\$	16,816,651	\$ 12,865,099	

7. LONG TERM DEBT

Financing Facility

On January 19, 2023 the Company entered into a facility agreement with Nebari Gold Fund 1, LP, Nebari Natural Resources Credit Fund I, LP and Nebari Natural Resources Credit Fund II, LP (collectively, "Nebari"), with Nebari Collateral Agent, LLC as collateral agent and certain Lion One subsidiaries as guarantors, for a financing facility of up to US\$37,000,000 (the "Financing Facility"). The Financing Facility consists of a US\$35,000,000 senior secured first lien term loan (the "Loan Facility") and a US\$2,000,000 (\$2,687,800) equity investment ("the Equity Investment") in common shares of the Company.

The total amount of the Loan Facility will be funded in up to three tranches, with the US\$23,000,000 funded on February 9, 2023 ("Tranche 1"), US\$6,000,000 funded on December 29, 2023 and US\$1,840,000 funded on January 3, 2024 ("Tranche 2") net of 2% closing fee and an additional US\$4,000,000 available at Company's option in one further tranche ("Tranche 3") within 18 months of closing interest on Tranche 1 is 8% (plus three-month secured overnight financing rate, as administered by Federal Reserve Bank of New York "SOFR"), and amortization is on the maturity date 42 months from the closing date on August 8, 2026, with no closing fees payable. Tranches 2 and 3 funding are subject to an 8% original issue discount and interest is 10% plus SOFR, with progressive amortization over 42 months from the funding date, with closing fees equal to 2% of the amounts funded.

On February 9, 2023, the Company received total proceeds of US\$25,000,000 from its Financing Facility, which was comprised of US\$23,000,000 (\$30,452,000) Tranche 1 loan facility and completion of the US\$2,000,000 (\$2,687,800) Equity Investment, with Nebari purchasing 3,125,348 common shares of the Company at a price of \$0.86 per share. The interest with respect to Tranche 1 will be capitalized and added to the principal amount outstanding of the Loan Facility from February 9, 2023 to September 30, 2024, with first quarterly interest US\$1,739,997 (\$2,365,535) paid in March 2024 and June 2024.

The Company received US\$7,840,000 net of 2% closing fee from its Financing Facility ("Tranche 2"), which was comprised of US\$6,000,000 (\$7,935,600) received on December 29, 2023 and US\$2,000,000 (\$2,671,200) received on January 3, 2024. The Company recorded the Original Issue Discount ("OID") fee of \$944,000 to the principal. The interest with respect to Tranche 2 will be expensed and added to the principal amount outstanding of the Loan Facility from December 29, 2023 to September 30, 2024, with monthly interest payments beginning on September 30, 2024. As part of Tranche 2, the Company amended the facility agreement to re-price the 15,333,087 Tranche 1 Warrants issued from CAD \$1.49 to CAD\$1.15 with expiry date extended from August 9, 2026 to February 9, 2027.

The Company has a \$1,662,724 interest payment deferral from Nebari to December 13, 2024, for Tranche 1 and 2 accrued interest that was payable on September 30, 2024.

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Expressed in Canadian Dollars)

September 30, 2024

7. LONG TERM DEBT (cont'd...)

LONG TERM DEBT (cont'd...)

Following the first month in which the Tuvatu Project produces at least 2,000 ounces of gold, the Company shall pay to Nebari a royalty equal to 0.5% of the net smelter returns on the first 400,000 ounces (equivalent to 2,000 ounces) of gold produced and sold from the Tuvatu Project.

Debt Issue Costs

As part of the Tranche 1 loan facility with Nebari, the Company issued 15,333,087 warrants ("Tranche 1 Warrants") of the Company to Nebari, exercisable into common shares of the Company at a price of \$1.49 for a period of 42 months from issuance (*Note 12 (d)*). The Tranche 1 Warrants are subject to an accelerator provision whereby the Company may accelerate the expiry date of up to 25% of the initial warrants in the event that the volume weighted average trading price of the common shares of the Company exceeds 100% over the strike price for a period of twenty consecutive days. The Company has the option to accelerate the expiry of further 25% portions of the warrants at four-month intervals, up to a maximum of 75% of the warrants issued.

The Tranche 1 Warrants were valued at \$5,194,865 using the Black-Scholes option pricing model using the following assumptions: risk free interest rate 2.99%, expected life of 3.5 years, annualized volatility 75% and dividend rate at nil. The Company also incurred deferred debt costs for professional and legal fees of \$850,804. Of the total debt issue costs incurred, the Company recorded \$559,100 as transaction costs which are netted against Tranche 1 with the debt and amortized over the term of the Loan Facility on an effective interest basis, and \$194,469 was recorded to as transaction costs for Tranche 2. The remainder of \$97,235 was recorded as deferred debt issue cost.

As part of Tranche 2, the Company amended the facility agreement to re-price the 15,333,087 Tranche 1 Warrants issued from CAD \$1.49 to CAD\$1.15 with expiry date extended from August 9, 2026 to February 9, 2027. The Company also incurred deferred debt cost for professional and legal fees of \$186,132, a closing fee of \$213,696 and an Original Issue Discount ("OID") fee of \$944,000. During the period ended June 30, 2024, the Company recorded \$194,469 transaction costs which are netted with the debt and amortized over the term of Tranche 2 on an effective interest basis.

During the period ended September 30, 2024, the Company amortized \$331,497 (June 30, 2024 – \$895,627) of deferred debt costs and recorded \$1,662,724 of interest expense. (June 30, 2024 - \$5,573,487). Of this amount accrued interest of \$Nil (June 30, 2024 - \$1,512,938) and \$Nil (June 30, 2024 - \$51,765) of accretion was capitalized to mineral property, plant and equipment (*Note 5*). During the period ended September 30, 2024, the Company recorded \$331,497 (June 30, 2024 - \$843,862) of accretion and \$1,662,724 (June 30, 2024 - \$4,060,549) of interest to interest and finance expense.

All debts under the Loan Facility are guaranteed by the Company and its subsidiaries: American Eagle Resources, Inc., Laimes International Inc., Auksas Inc., and Lion One Pte Limited, and secured by the assets of the Company and pledges of the securities of the aforementioned Company's subsidiaries. The Loan Facility includes certain covenants that are calculated on last day of each calendar month. As at September 30, 2024, the Company was in compliance with all covenants.

8. OTHER ASSETS

Royalty Interest on Olary Creek - South Australia

On March 19, 2019, the Company entered into a sale agreement ("Agreement") to sell its 51% Olary Creek Tenement ("Olary") interest including a 47% interest in the iron ore and manganese rights on the Olary Creek Joint Venture in South Australia, which included a 25% interest free carried through the completion of a bankable feasibility study and the decision to mine, and an optional 22% participating interest, to Olary Magnetite Pty Ltd, a wholly owned subsidiary of Lodestone Mines Limited ("Lodestone") for the following proceeds:

- 1% FOB royalty on Iron Ore or manganese concentrates sold from Olary plus AUD\$0.75 per tonne of Iron Ore or manganese concentrates or 2% FOB royalty on Iron Ore or manganese concentrates sold from Olary.
- Lodestone shall advance against the FOB royalty payable noted above:
 - a. 10% of all funds raised by Lodestone until funding specifically designated as funding for a Bankable Feasibility Study ("BFS") has been raised;
 - b. AUD\$1,000,000 upon funding being raised by Lodestone specifically designated as funding for a Bankable Feasibility Study;
 - c. AUD\$3,000,000 upon a Decision to Mine being made; and
 - d. AUD\$3,000,000 upon 18 months after a Decision to Mine being made.

During the period ended June 30, 2024, the Company wrote down the carrying value of the Olary Creek property by \$28,262, which was disclosed in other assets.

Mining Equipment Deposit

In July 2018, the Company paid an AUD\$1,097,280 (\$1,075,334) deposit to an Australian mining contractor towards the refurbishment and purchase of certain mining equipment. In May 2021, the Company requested the delivery of the mining equipment to Fiji and to date it has not been delivered. During the year ended June 30, 2021, the Company wrote down the deposit by \$632,147 to its estimated carrying value. As September 30, 2024, the estimated carrying value is \$445,427 (June 30, 2024 - \$445,427).

16. SHARE CAPITAL AND RESERVES

a) Authorized share capital

Unlimited number of common shares without par value.

b) Bought Deal Offering

On July 26, 2024, the Company completed a market public offering of 31,485,379 units, at price of \$0.37 per unit for gross proceeds of \$11,649,590.24 (the "Offering"). Each unit consists of a common share of the Company and one common share purchase warrant. Each whole common share warrant, may be exercised to purchase a common share at a price of \$0.50 until July 26, 2027. The Company recognized \$2,046,550 residual value relating to the share purchase warrants from the offering.

In connection to the Offering, the Company incurred broker, filing and legal fees of \$1,304,537 and recognized \$199,673 of share issuance costs related to the issuance of 1,996,891 non-transferable compensation options ("CO") (Note 16(e)), each CO is exercisable to purchase a common share at a price of \$0.37 until July 26, 2026. The fair value of the CO's of \$199,673 was determined using the Black-Scholes option pricing model using the following assumptions: risk free interest rate 3.92%, expected life of 2 years, annualized volatility 64.99% and dividend rate at nil.

c) Stock options

The TSX-V accepted the Company's Stock Option Plan, which was approved by the Company's shareholders at the Annual General Meeting ("AGM") held on December 16, 2022. A rolling stock option plan has been implemented whereby a maximum of 10% of the issued shares will be reserved for issuance under the plan. Options can be granted for a term not to exceed ten years. Shareholder approval must also be obtained yearly at the Company's AGM and in addition, submitted for review and acceptance by the TSX-V each year.

Stock option transactions are summarized as follows:

	Number of Stock Options	Weighted Average Exercise Price
Balance, June 30, 2023 Granted Exercised Forfeited and expired	11,138,333 7,130,000 (155,000) (3,981,667)	\$ 1.15 1.00 0.75 0.94

19. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial instruments

Cash and cash equivalents, short term investments, receivables, deposits, accounts payable and accrued liabilities, lease liability, Loan Facility and accrued interest are carried at amortized cost. The Company considers the carrying amount of the current financial assets and liabilities measured at amortized cost to approximate their fair value due to the short-term nature of the financial instruments. The fair value of long-term liabilities are initially recorded at fair value and subsequently carried at amortized cost using rates comparable to market interest rates.

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

Financial risk factors

Credit risk

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its liquid financial assets including cash, cash equivalents, short-term investments and receivables. The Company limits exposure to credit risk on liquid financial assets through maintaining its cash, cash equivalents, short-term investments with high-credit quality financial institutions.

Receivables mainly consist of Goods and Services Tax ("GST") receivable from the Government of Canada, GST receivable from the Government of Australia, and Value Added Tax ("VAT") receivable from the Government of Fiji. The Company has not had issues with respect to collectability of these amounts and believes that the credit risk concentration with respect to receivables is minimal.

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Expressed in Canadian Dollars)

September 30, 2024

19. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd...)

Financial risk factors (cont'd...)

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations associated with its financial liabilities. The Company will raise funds for future use from equity financings and other methods as contemplated by management to satisfy its capital requirements and will continue to depend heavily upon these financing activities. All of the Company's current financial liabilities have contractual maturities of 30 days or due on demand and are subject to normal trade terms. As at September 30, 2024, the Company had a working capital of \$26,747,147.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. The Company does not have a practice of trading derivatives.

a) Interest rate risk

The Company has cash balances, investment-grade short-term deposit certificates issued by its banking institution and long-term debt under the loan facility. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. Advances under the loan facility will bear interest at the 3 month SOFR +8% for Tranche 1 and +10% for Tranche 2/3. The Company manages this risk by monitoring fluctuations in SOFR and in the event 3-month SOFR is in excess of 5%, the Company has the option to pay that portion of the interest attributable to Term SOFR that exceeds 5% by issuing shares of the Company subject to the approval of the TSX-V.

b) Foreign currency risk

The Company's revenue is generated in US dollars and has Fijian mine operations expenditures that are conducted in Fijian dollars, US dollars, Canadian dollars and Australian dollars. A portion of the Company's financial assets (liabilities) and other assets are denominated in US dollars and Australian dollars. As such, the Company is exposed to foreign currency risk in fluctuations. The Company manages this risk by entering into short term forward exchange contracts with durations of one to two months on a intermittent basis to minimize foreign exchange fluctuations.

As at September 30, 2024, the Company's net foreign denominated financial assets (liabilities) are as follows:

	Foreign currency	Canadian dollar equivalent
Australian Dollar	(397,913)	(371,372)
Fijian Dollar	4,896,288	3,013,597
USD Dollar	(31,376,067)	(42,354,553)

The sensitivity of the Company's comprehensive loss due to changes in the carrying values of monetary assets and liabilities denominated in foreign currencies is as follows.

Increase / decrease in foreign exchange rate		June 30, 2024		
+ 5% - 5%	\$	1,985,943 (1,985,943)	\$	2,072,231 (2,072,231)

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Expressed in Canadian Dollars)

September 30, 2024

19. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd...)

Financial risk factors (cont'd...)

c) Price risk

The Company is exposed to price risk with respect to commodity and equity prices. The Company closely monitors commodity prices to determine the appropriate strategic action to be taken by the Company. The Company manages this risk by entering into short term gold forward contracts with durations of one to two months on a intermittent basis to minimize gold price fluctuations.

20. CAPITAL MANAGEMENT

The Company's capital management policy has the objective of maintaining a strong, but flexible capital structure that optimizes the cost of capital, creditor and market confidence while sustaining the future development of the business.

The Company manages its capital structure and makes adjustments to it in the light of changes in economic conditions. The Company's capital structure includes shareholders' equity of \$178,519,637 (June 30, 2024 - \$165,225,554). In order to maintain or adjust the capital structure, the Company may from time-to-time issue shares, seek debt financing and adjust its capital spending to manage current and working capital requirements. There were no changes to the Company's approach to capital management during the period ended September 30, 2024.
