Australia
Tel: (08) 9481 2243

Set out below is a review of the activities, results of operations and financial condition of Lion One Metals Limited ("LIO", "Lion One", or the "Company") and its subsidiaries for the period ended December 31, 2016. The discussion below should be read in conjunction with the Company's unaudited condensed consolidated interim financial statements for the period ended December 31, 2016 and audited consolidated financial statements for the year ended June 30, 2016. Those financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board. All dollar figures included in the following Management Discussion and Analysis ("MD&A") are quoted in Canadian dollars unless otherwise indicated. This MD&A has been prepared as at February 10, 2017.

The Company is listed on the TSX Venture Exchange ("TSX-V") under the symbol LIO, on the Australian Securities Exchange ("ASX") under the symbol LLO, and on the OTCQX market under the symbol LOMLF.

Additional information related to the Company is available on SEDAR at www.sedar.com and the Company's website at www.liononemetals.com.

BACKGROUND AND CORE BUSINESS

Lion One Metals Limited was incorporated on November 12, 1996 under the name X-Tal Minerals Corp. ("X-Tal") under the laws of the Province of British Columbia, Canada. On January 28, 2011, the Company executed a reverse takeover ("RTO") of X-Tal by American Eagle Resources Inc. ("AME") and changed its name to Lion One Metals Limited.

The Company's primary asset is the 100% held Tuvatu Gold Project ("Tuvatu"), located on the island of Viti Levu in the Republic of Fiji. The Company operates in Fiji under its wholly-owned subsidiary Lion One Limited (Fiji).

The Company's head office and principal address is 311 West 1st Street, North Vancouver, BC, V7M 1B5. The address of the registered and records office is Suite 1700 – West Hastings Street, Vancouver, BC, V6E 2E9.

COMPANY HIGHLIGHTS

Private Placement

On September 16, 2016, the Company announced the completion of a non-brokered private placement (the "Private Placement") of 41,536,436 units at a price of \$0.92 for gross proceeds of \$38,213,521.

Proceeds of the Private Placement will be used to fund the exploration and development of the Company's 100% owned and fully permitted high grade Tuvatu Gold Project in Fiji and for working capital purposes. Each unit in the Private Placement consists of one common share (the "Common Shares") and one transferable common share purchase warrant (the "Warrants"). The Warrants are exercisable at a price of \$1.35 per share until March 16, 2018, subject to an accelerated expiry option whereby the Company can trigger an accelerated 30-day expiry of the Warrants if the closing price of the Company's Common Shares listed on the TSX-V remain higher than \$1.75 for 20 consecutive trading days. On the 20th consecutive trading day above \$1.75 (the "Acceleration Trigger Date"), the Warrants' expiry date may be accelerated to 30 trading days after the Acceleration Trigger Date by the issuance of a news release announcing such acceleration, within two trading days of the Acceleration Trigger Date. The Warrants, if fully exercised, represent additional potential gross proceeds of \$56,074,189.

Significant institutional investors in the Private Placement include New York-based investment firm Donald Smith Value Fund, L.P. ("Donald Smith") which acquired 14,250,000 units in the Private Placement for gross proceeds of \$13,110,000 and has become the Company's largest institutional shareholder and a new insider of the Company, holding 14.01% of the Company on an undiluted basis, or 19.90% on a fully diluted basis. This is Donald Smith's first acquisition of Common Shares of the Company. In connection with the Private Placement, the Company has paid an aggregate of \$1,760,402 in finders' fees in accordance with the policies of the TSX Venture Exchange and incurred other share issue costs of \$257,202.

Memorandum of Understanding with Ansteel-CapitalAsia Global Engineering Inc.

On August 24, 2016, the Company announced the signing of a non-binding Memorandum of Understanding ("MOU") for an Engineering Procurement Construction Contract ("EPC Contract") and Vendor Financing Agreement with Ansteel-CapitalAsia Global Engineering Inc. ("Ansteel") covering a comprehensive EPC and financing package for the development of the Tuvatu Gold Project in Fiji.

The scope of the EPC contract covers the design, construction, start-up testing, and commissioning of the Tuvatu gold processing plant, tailings dam and surface infrastructure. Ansteel will also furnish all materials, equipment, machinery, tools and consumables, provide quality control and administration.

In addition to the EPC Contract, Ansteel will also provide vendor financing for up to 80% of the anticipated value of the EPC Contract in the form of a Deferred Payment Amount of approximately US\$39,000,000-\$44,000,000. The Company will fund a minimum of US\$10,000,000 or approximately 20% of the anticipated value of the EPC Contract. The Deferred Payment will be a senior secured obligation of the Company guaranteed by the Company's assets, to be serviced through a Deferred Payment Plan with 7% annual interest payable in quarterly installments. In connection with the Down Payment, Lion One will issue, subject to TSX-V approval, warrants in the amount of approximately 10% of the Loan Facility at a price of \$1.42 per share for a period extending to the maturity date of the earlier of the final scheduled payment under the Deferred Payment Plan or 5 years from closing. Early repayment of the Deferred Payment Amount may occur any time without charge.

Ansteel-CapitalAsia Global Engineering Inc. is a JV company of Ansteel Group Engineering Technology Development Company Ltd and CapitalAsia Consulting (Canada) Inc. The Ansteel Group is based in Liaoning Province in northern China and is that country's largest iron ore miner and third largest steel maker, with an annual production capacity exceeding 38 million tons of raw steel and pig iron. The Ansteel Group operates several large iron ore mines and more than a dozen steel-rolling and steel production plants worldwide. Ansteel exports its products to over 30 countries including the USA, UK, Japan, and Australia, and is listed on the Hong Kong and Shenzhen Stock Exchanges. In 2015 the Ansteel Group was ranked number 451 on Fortune's Global 500 List.

Diamond Drilling

Lion One commenced a program of ongoing drilling of infill and extensional targets of the Tuvatu gold deposit in November 2016, with one surface drill rig operating until the end of the year. This program was also accompanied by the commencement of dewatering of the exploration decline in preparation for underground drilling in 2017.

Drilling results from the first hole of the program (TUDDH406) have included some of the best results returned from the project to date, and include **71.41 g/t Au over 8.41 meters**, including **126.67 g/t Au over 4.56 meters**. This hole was drilled from surface to a vertical depth of 75 meters.

Results from TUDDH 406

Hole ID	N	E	RL	Azimuth	Dip	Depth m
TUDDH 406	3920834.00	1876426.00	219.66	67	-62	150

From (m)	To (m)	Width (m)	Grade (g/t Au)	Lode Targets
4.60	5.10	0.50	5.93	
45.19	46.15	0.96	1.04	GRF SKL2
48.42	51.30	2.88	5.30	GRF SKL2
59.05	59.35	0.30	4.29	SKL3
61.34	61.60	0.26	1.95	SKL3
70.93	71.23	0.30	23.30	SKL4
72.30	73.55	1.25	10.16	SKL4
96.10	104.51	8.41	71.41	SKL6-7
<i>includes</i>				
96.10	100.66	4.56	126.67	SKL6-7
<i>and</i>				
102.71	104.51	1.80	12.58	SKL6-7
116.55	117.27	0.72	36.20	SKL8
142.11	142.40	0.29	1.07	SKL

Subsequent diamond drill holes also returned significant results. The Company received the results of these additional drill holes late in 2016. All diamond drill holes focused on infill targets at Tuvatu. Results received included 4.05m @ 12.36 g/t Au (TUDDH 407), 2.55m @ 13.95 g/t Au (TUDDH 408), 3.92m @ 12.54 g/t Au (TUDDH 409), 2.42m @ 24.07 g/t Au (TUDDH410), and 1.39m @ 16.06 g/t Au (TUDDH 412), with further highlights summarized as follows:

Tuvatu Infill Drilling Results - December 2016

TUDDH Hole ID	From (m)	To (m)	Interval (m)	Grade (g/t Au)
407	71.43	75.48	4.05	12.32
	<i>includes</i>		1.29	34.92
408	41.60	41.90	0.30	76.60
	99.17	101.72	2.55	13.95
409	78.93	85.70	6.77	7.83
	<i>includes</i>		3.92	12.54
410	86.94	89.36	2.42	24.07
412	48.46	49.85	1.39	16.06

The infill drilling results (diamond holes TUDDH 406 to 412) further confirm the high grades and continuity of near surface mineralization at Tuvatu. The Company's objective with the ongoing drilling program is to extend and increase confidence in the resource ahead of mine development at Tuvatu.

Navilawa Tenement Tender

On October 12, 2016, the Company announced that it had applied with Fiji's Mineral Resource Department ("MRD") for a Special Prospecting License ("SPL") for the Navilawa tenement, adjoining Lion One's Tuvatu tenements. The MRD solicited expressions of interest for the new Navilawa tenement in July and August of 2016 after the lapse and expiry of the previous holder's exploration license. The Navilawa tenement directly adjoins the northern boundary of Lion One's tenements at Tuvatu, which if combined, would consolidate ownership of the entire Navilawa mineral complex under a +30,000 hectare exploration license package with Tuvatu's 384.5 hectare Mining Lease (SML 62) and mining and processing operation, currently under development, at its center. The Company has submitted a tender for the Navilawa tenement with \$15 million of initial exploration expenditures proposed over five years.

The Navilawa project area has at least 10 well defined prospects including the Kingston Mine, Banana Creek, and Tuvatu North. The most significant historic results returned were surface rock chip samples of 46.30 g/t Au from Banana Creek; 176.27 g/t Au from the Kingston Mine, and 8.50 g/t Au from Tuvatu North, where a rock chip sample was taken from just inside SPL 1296 and adjacent to the Tuvatu resource. Although little systematic historical exploration has been undertaken in the area, six of the prospects have historic workings with short shafts or adits up to 15 meters deep or manual workings on copper and gold bearing rocks as is the case at the Central Ridge prospect. Mapping, sampling and geophysics clearly demonstrates that the Tuvatu gold deposit extends north into the Navilawa tenement area.

Jomaki Discovery

On October 12, 2016 the Company announced a new mineral discovery at the Jomaki Ridge prospect inside Tuvatu Mining Lease (SML 62). The Jomaki Ridge Prospect situated 1.50 km south-west of the planned processing plant site at Tuvatu. Lion One's Fiji exploration team discovered significant extensions of a pervasively altered and densely veined zone situated between the contact of volcanic units and the micro-monzonite intrusive. Visible gold has been detected at the surface and in some recently dug trenches. An extensive north-east south-west veinset at Jomaki Ridge is cross cut by additional north-south veins which are potentially extensions of the UR1 and UR 2 Lodes already recognized at Tuvatu, and which host a significant percentage of the Tuvatu resource. The highest value returned to date from the Jomaki Ridge Prospect was a rock chip sample grading 125 g/t Au.

Dewatering, Decline, Drilling

The Company also reported on October 12, 2016 the mobilization of its prime contractors and suppliers for the dewatering and rehabilitation of the existing decline. A new diesel powered pumping station was delivered and became operational in November 2016.

The Company has now dewatered past the 200m point in the existing decline. The Company has also installed ventilation fans in preparation for a planned diamond drilling program from underground. Slippage along the Core Shed Fault area (140m from the portal) was less than anticipated and was cleared using an underground loader. The Company halted all fieldwork for several weeks at the end of the year, before resuming in mid-January 2017.

EXPLORATION AND EVALUATION ASSETS**PROPERTIES - FIJI*****Tuvatu Gold Project, Viti Levu***

The Company's primary asset is the Tuvatu Gold Project located near Nadi on the island of Viti Levu, Fiji. The Tuvatu Gold Project has been fully permitted for development, construction and mining by the Government of Fiji with the grant of a Special Mining Lease (SML 62) in 2015, and prior Department of Environment approvals for the Tuvatu Environmental Impact Assessment and the Construction and Operational Environmental Management Plans. The Company signed a 21-year Surface Lease agreement with local landowners and the iTaukei Land Trust in 2014.

SML 62 is a designated area within the original boundaries of the Company's SPL's 1283 and 1296. SML 62 provides exclusive rights for the potential development, construction, and operation of mining, processing, and waste management infrastructure at Tuvatu. The Mining Lease area covers 384.5 hectares and contains all of the current NI 43-101 resource and multiple high grade prospects in the Navilawa goldfield, one of Fiji's major volcanic intrusive complexes. The Tuvatu camp is located 16 km by road from the Lion One Fiji head office adjacent to the International Airport in Nadi, and 35 km from the Port of Lautoka.

The terms of SML 62 provide for certain performance and reporting requirements. The SML has been granted for a term of ten years provided the Company complies with the terms of the lease. Extensions to the term can be applied subject to the terms of the lease and the Mining Act. SPL's 1283, 1296, and 1465 were renewed in 2013 for 3 year terms. The Company has satisfied the expenditure requirements under the current term of SPL 1283 and 1296 with renewal applications submitted to the MRD. The Company has submitted a renewal application for SPL 1465 under a reduced tenement size to focus on the core value of the tenement.

High grade, low-sulphidation gold mineralization of the Tuvatu deposit is associated with the emplacement of an alkalic volcanic intrusive complex in the Navilawa Caldera, one of several large mineralized systems aligned along the Viti Levu Lineament, Fiji's epithermal gold corridor. The geologic setting of Tuvatu shares affinities with the Vatukoula deposit in the neighboring Tavua Caldera, where over seven million ounces of gold have been recovered since mining commenced at Vatukoula in 1933.

The Fijian Islands are located along the Pacific Island Arc, which hosts a number of other well-known major mineral epithermal gold deposits systems such as the Lihir, Porgera, Ok Tedi, and Wafi-Golpu gold deposits in Papua New Guinea.

On July 14, 2015, the Company published a National Instrument ("NI") 43-101 Preliminary Economic Assessment (the "PEA") for Tuvatu, prepared by independent consultants Canenco Canada Inc., AMC Consultants Pty Ltd., Knight Piésold Pty. Ltd., and Mining Associates Pty Ltd.

The PEA is based on the resource estimate contained in the technical report entitled "Tuvatu Resource Estimate" dated June 6, 2014 and prepared by Ian Taylor of Mining Associates Pty Ltd. Tuvatu hosts an indicated mineral resource of 1.1 million tonnes grading 8.46 g/t gold for 299,500 contained ounces, and an inferred mineral resource of 1.5 million tonnes grading 9.70 g/t gold for 468,000 contained ounces at a cut-off grade of 3.0 g/t Au.

The resource is summarized as follows:

Tuvatu Resource Summary			
Cutoff	Indicated		
g/t	tonnes	g/t	ounces
1.0	1,943,000	5.61	350,300
2.0	1,435,000	7.07	326,200
3.0	1,101,000	8.46	299,500
5.0	683,000	11.25	247,000
Cutoff	Inferred		
g/t	tonnes	g/t	ounces
1.0	3,022,000	5.8	561,000
2.0	2,156,000	7.5	520,000
3.0	1,506,000	9.7	468,000
5.0	872,000	13.9	390,000

The PEA published in July 2015 provides the following highlights (US\$1,200/oz Au base case):

- Capital costs of US\$48.6 million; 15 month pre-production schedule
- 1.5 year payback, IRR of 67% (before tax), NPV5% of US\$117 million
- 352,931 oz. gold production over first 7 years at average grade of 11.31 g/t gold
- Operating costs of US\$567 per oz. Au; All-in sustaining costs of US\$779 per oz. Au

The Company has been reviewing and enhancing a number of aspects of its 2015 study, with a view to move forward with the project as soon as possible.

The PEA is filed on the Company's profile at www.sedar.com and on the Company's website at www.liononemetals.com.

The PEA is preliminary in nature and includes inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is no certainty that the PEA will be realized.

Expenditures incurred on the Fiji properties are as follows:

	June 30, 2015	Additions	June 30, 2016	Additions	December 31, 2016
Acquisition costs	\$ 21,915,063	\$ -	\$ 21,915,063	\$ -	\$ 21,915,063
Camp costs and field supplies	788,351	42,785	831,136	35,219	866,355
Consulting fees	2,040,595	195,273	2,235,868	29,192	2,265,060
Depreciation	459,324	155,734	615,058	58,816	673,874
Dewatering and environmental	249,310	167,919	417,229	157,023	574,252
Drilling	2,222,866	-	2,222,866	466,387	2,689,253
Fiji office administration	936,822	508,469	1,445,291	219,050	1,664,341
Permitting and community consults	603,548	72,709	676,257	65,577	741,834
Road building and site works	583,168	107,206	690,374	12,206	702,580
Salaries and wages	4,087,934	595,663	4,683,597	590,362	5,273,959
Sample preparation, assaying	1,160,573	20,738	1,181,311	38,981	1,220,292
Technical reports	891,030	10,522	901,552	-	901,552
Travel	558,514	86,740	645,254	97,963	743,217
Vehicle and transportation	320,323	35,424	355,747	20,678	376,425
Write-off of exploration assets	-	(771,648)	(771,648)	-	(771,648)
Cumulative foreign currency translation adjustment	(1,244,487)	1,305,460	60,973	28,840	89,813
	\$ 35,572,934	\$ 2,532,994	\$ 38,105,928	\$ 1,820,294	\$ 39,926,222

Details regarding the expenditure commitments on the SPL's are included in the accompanying condensed consolidated interim financial statements.

PROPERTIES – AUSTRALIA

Olary Creek, South Australia

The Olary Creek Project (Exploration License 4664) is located in South Australia 70 km southwest of Broken Hill, NSW, and 40 km south of the Barrier Highway. To the north of the area is an open access railway with direct routes to major capital cities and ports. The property is considered prospective for a range of minerals, having previously been drilled for uranium and copper, and subsequently for iron ore. The project contains several iron rich siltstone units of the Braemar Iron Formation, which are highly prospective for bulk magnetite deposits.

The Exploration Licence is currently in the final process of being renewed after the term of the previous licence had expired. The process is straightforward but takes time as it must go through the Native Title process and renewed terms and conditions for the tenement in the process.

The original exploration joint venture on the Olary Creek Project was formed in 2010 between Lion One Australia and Perth-based HJH Nominees ("HJH"). In 2011 HJH signed a farm-in agreement with Yukuang Australia (WA) Resources Pty Ltd ("Yukuang"), the Australian subsidiary of Henan Yukuang, a state-owned mineral exploration and mining company based in Henan Province, Peoples Republic of China, whereby Yukuang could earn a combined 75% interest in the iron and manganese rights. In April 2012 the HJH/Yukuang partnership reached the \$5,000,000 expenditure requirement with Lion One Australia retaining a 25% free carried interest. In July 2013 Lion One Australia exercised its preemptive right over the 22% interest held by HJH and negotiated new Farm-in, Joint Venture, and Split Commodity Agreements with Yukuang covering the iron and manganese rights. Lion One Australia now holds a 51% interest in the tenement and has retained 100% rights for all other commodities. Lion One currently retains a 47% interest in the iron ore and manganese rights on the Olary Creek Joint Venture.

The Company's 47% joint venture interest comprises a 25% interest free carried through the completion of a bankable feasibility study and the decision to mine, and a 22% participating interest. The Company holds an option to convert its 25% free carried interest, within 90 days of the decision to mine, to a 2% FOB royalty, or to a 1% FOB royalty with a \$0.50 per tonne production royalty. The 22% participating interest is an optional contributing interest. There are no current expenditure obligations for the Company's joint venture interest.

In excess of 16,000 meters of diamond and reverse circulation drilling have been carried out by the joint venture partners to test zones of outcropping iron mineralization that extend along 7.5 kilometers of strike and have been observed to improve in grade and thickness at depth. The prospective Braemar Iron Formation remains open at depth and open along strike within the tenement area.

On March 6, 2014, the Company published an initial NI 43-101 Mineral Resource Estimate for the Olary Iron Ore Project, in South Australia. The technical report "Olary Iron Project Mineral Resource Estimate, South Australia" was commissioned by joint venture partner Yukuang and completed by SRK Consulting Australasia Pty Ltd.

Highlights of the estimate include:

Olary Iron Project Resource Estimate Summary									
Category	Tonnage	Fe %	SiO2%	Al2O3%	LOI%	S%	P%	DTR%	Density
Indicated	214,000,000	26.3	40.8	6.9	3.9	0.029	0.24	26.4	3.12
Inferred	296,000,000	26.4	41.3	6.9	3.7	0.027	0.25	27.3	3.10

Table 1: Summary of Olary Iron Project Resource Estimate using cutoff grade of 20% Fe

Category	Concentrate Tonnage	DTR Concentrate Grades					
		Fe %	SiO2%	Al2O3%	LOI%	S%	P%
Indicated	57,000,000	69.6	2.9	0.3	-3.1	0.008	0.01
Inferred	81,000,000	69.8	2.6	0.2	-3.1	0.009	0.008

Table 2: Davis Tube Recovery (DTR) test results and Fe content for the magnetic concentrate for composite RC and Diamond drillhole samples at grind size of 38 microns and 10% DTR cut-off grade

A full tenement listing is provided in Schedule "A" at the end of this MD&A.

Albert Siega, P.Eng., a Qualified Person under the meaning of Canadian National Instrument 43-101, is a consultant to the Company and responsible for the technical content of this Management's Discussion and Analysis.

OUTLOOK

The Company is focused on the advancement of its primary asset, the 100% owned and fully permitted Tuvatu Gold Project in Fiji. Lion One has received all of the mandatory regulatory approvals, including a 10-year renewable mining lease and 21-year surface lease, for the complete development of mining and processing operations at Tuvatu.

The Company is carrying out an extensive diamond drilling program targeting ore lodes to be developed in the first two or three years of mining. Infill and extensional holes have been drilled or planned to be drilled on lodes adjacent to the existing portal, and which can easily be accessed from that portal.

At the same time as this drilling program is undertaken, other proposed development work includes both dewatering and refurbishment of the existing decline, which will allow access to those mineralized zones targeted for development in the initial years as outlined in the 2015 PEA. The Company has previously conducted water inflow studies and has a renewed dewatering license first obtained in 2011. Work will also focus on the further clearing and earthworks of the proposed processing plant area and the tailings storage facility area in preparation for proposed construction activities.

The second phase of proposed underground work includes the development of a new western portal and 500 meter decline to be driven into the central mineralized zone of the Tuvatu resource. These development activities will be undertaken in conjunction with surface and underground drilling focused Tuvatu and discussed above. Further near surface targets within the mining lease area will be explored with the potential to add low-cost ounces to the resource base.

The Company advises that it has not based a production decision on a feasibility study of mineral reserves, demonstrating economic and technical viability, and, as a result, there may be an increased uncertainty of achieving any particular level of recovery of minerals or the cost of such recovery, including increased risks associated with developing a commercially mineable deposit. Historically, such projects have a much higher risk of economic and technical failure. There is no guarantee that production will begin as anticipated or at all or that anticipated production costs will be achieved. Failure to commence production would have a material adverse impact on the Company's ability to generate revenue and cash flow to fund operations. Failure to achieve the anticipated production costs would have a material adverse impact on the Company's cash flow and future profitability.

The Company further cautions that the July 2015 NI 43-101 Tuvatu PEA Technical Report is preliminary in nature. Mineral resources are not mineral reserves and do not have demonstrated economic viability. There is no certainty that the Tuvatu PEA will be realized.

Basic and diluted loss per share	(0.01)	(0.01)	(0.02)	(0.01)

	December 31, 2015	September 30, 2015	June 30, 2015	March 31, 2015
Total assets	\$ 42,683,320	\$ 41,252,665	\$ 41,099,076	\$ 42,285,229
Exploration and evaluation assets	39,468,218	37,167,657	36,069,453	36,418,974
Working capital	334,637	1,249,948	3,878,464	4,754,692
Interest income	2,356	4,552	7,809	15,115
Net loss for the period	(373,784)	(444,595)	(491,277)	(421,569)
Comprehensive income (loss) for the period	1,447,823	76,263	(1,372,106)	1,049,644
Basic and diluted loss per share	(0.01)	(0.01)	(0.01)	(0.01)

The focus of the Company over the periods presented has consistently been the exploration and development of its Fijian exploration and evaluation assets. The differential between net and comprehensive loss in each period reflects the translation adjustment of the assets and liabilities of the Company's subsidiaries, Lion One Limited, which is maintained in Fijian dollars and Lion One Australia Pty Ltd., which is denominated in Australian dollars.

Results of Operations for the six months ended December 31, 2016 compared to 2015

The comprehensive loss for the six month period ended December 31, 2016 was \$1,292,416 (2015 – income of \$1,524,086). Significant changes to the comprehensive loss are explained as follows:

- Consulting fees decreased from \$65,750 in 2015 to \$33,750 in 2016 due to planned expense reductions.
- Investor relations expenses have decreased by \$53,706 to \$91,090 (2015 - \$144,796) as the Company engaged in additional shareholder outreach following the publication of the 2015 PEA.

- Management fees have increased by \$39,469 to \$91,165 (2015 - \$51,696) as a result of reinstated and increased compensation to the senior management team subsequent to completion of the financing.
- Professional fees decreased by \$61,173 to \$67,389 (2015 - \$128,562) as the Company had engaged professional services firms in the prior period to evaluate financing and corporate strategy.
- Share-based payments expense of \$656,857 (2015 - \$32,154) has increased due to the vesting of stock options granted in current and prior periods.
- Travel increased to \$73,800 in the current period from \$3,762 as the Company pursues the MOU with Ansteel and incurred expenses with respect to the financing.
- During the six month period ended December 31, 2016, the Company recognized a foreign exchange loss of \$13,031 on its net assets denominated in Fijian and Australian dollars reflecting a strengthening of the Fijian dollar and Australian dollar against the Canadian dollar since June 30, 2016. A gain of \$2,342,465 was recognized in the comparative period.

Results of Operations for the three months ended December 31, 2016 compared to 2015

The comprehensive loss for the period ended December 31, 2016 was \$1,067,932 (2015 – income of \$1,447,823). Significant changes to the comprehensive loss are explained as follows:

- Consulting fees decreased from \$32,000 in 2015 to \$18,750 in 2016 due to planned expense reductions.
- Investor relations expenses have increased by \$9,835 to \$52,377 (2015 - \$42,542) as the Company reinstated and increased investor relations staff salaries subsequent to completion of the financing.
- Management fees increased by \$41,157 to \$71,887 (2015 - \$30,730) as the Company reinstated and increased compensation to the senior management team subsequent to completion of the financing.
- Share-based payments expense of \$259,324 (2015 - \$23,400) has increased due to the recognition of the value over the vesting period of options granted in prior periods.
- Travel increased to \$20,274 in the current period from \$2,429 as the Company pursues the MOU with Ansteel.
- During the three months ended December 31, 2016, the Company recognized a foreign exchange loss of \$507,225 on its net assets denominated in Fijian and Australian dollars reflecting a weakening of the Fijian dollar and Australian dollar against the Canadian dollar since September 30, 2016. A gain of \$1,821,607 was recognized in the comparative period.

Cash flows for the period ended December 31, 2016 compared to 2015

Cash has increased by \$33,246,950 to \$33,309,104 at December 31, 2016 from a balance of \$62,154 as at June 30, 2016.

Cash outflows from operating activities increased by \$793,621 to \$1,623,576 (2015 – \$829,955). This is consistent with higher cash outflows due to receipt of financing proceeds and settlement of accumulated payables during the current period.

Cash outflows from investing activities of \$1,319,945 (2015 - \$2,803,268) materially reflect investment in the Tuvatu Gold Property. In the first quarter of 2015, the Company deposited a performance and environmental bond of FJD\$2,700,000 (CAD \$1,673,960) with the MRD on SML 62 resulting in higher cash outflows in the prior period.

Cash inflows from financing activities increased to \$36,202,917 (2015 - \$Nil) due to the private placement carried out this period and the exercise of stock options.

Financial Position

Receivables increased by \$74,798 to \$102,675 (June 30, 2016 - \$27,877) due to a higher receivable of input credits under the Value-Added Tax ("VAT") program with the Government of Fiji. The Company remits its VAT return annually and anticipates recovering the VAT credits. Current liabilities decreased by \$796,214 to \$406,877 (June 30, 2016 - \$1,203,091) due to repayment of accumulated amounts payable, including amounts due to related parties, out of financing proceeds received in the current period.

Shareholders' equity increased by \$35,987,658 to \$75,987,613 (June 30, 2016 - \$39,999,955) which reflects the shares and warrants issued under the private placement and comprehensive loss recognized for the period offset by share-based payments.

LIQUIDITY AND CAPITAL RESOURCES

At December 31, 2016, the Company had a working capital of \$33,019,877 including cash of \$33,309,104 as compared to working capital deficiency of \$1,102,558 including cash of \$62,154 at June 30, 2016. The Company believes it has adequate financing for the next twelve months due to net cash proceeds of \$36,195,917 raised under the private placement completed during the period.

The Company's continued development is contingent upon its ability to raise sufficient financing. There are no guarantees that additional sources of funding will be available to the Company; however, management is committed to pursuing all possible sources of financing in order to execute its business plan including new equity issues and debt issuances. Many factors influence the Company's ability to raise funds, including the health of the resource market, the climate for mineral exploration investment, the Company's track record, and the experience and caliber of its management. Actual funding requirements may vary from those planned due to a number of factors, including the progress of exploration and development activities. Management believes it will be able to raise equity capital as required in the long term, but recognizes there will be risks involved that may be beyond their control.

OUTSTANDING SHARE DATA

At the date of this report the Company has 101,722,044 issued and outstanding common shares, 41,536,436 warrants and 6,525,000 outstanding stock options.

OFF STATEMENT OF FINANCIAL POSITION ARRANGEMENTS

At December 31, 2016, the Company had no material off statement of financial position arrangements such as guarantee contracts, contingent interest in assets transferred to an entity, derivative instruments obligations or any obligations that trigger financing, liquidity, market or credit risk to the Company.

PROPOSED TRANSACTIONS

Other than as disclosed elsewhere in this document, the Company does not have any proposed transactions.

RELATED PARTY TRANSACTIONS

The financial statements include the financial statements of Lion One Metals Limited and its 100% owned subsidiaries American Eagle Resources Inc. (Canada), Laimes International Inc. (BVI), Auksas Inc. (BVI), Lion One Limited (Fiji), Lion One Australia Pty Ltd. (Australia) and Piche Resources Pty Ltd. (Australia).

Key management personnel is comprised of Walter Berukoff, Chief Executive Officer, Hamish Greig, Vice-President, Stephen Mann, Managing Director, Samantha Shorter, Chief Financial Officer, Stephanie Martel, Vice President Administration, and Directors of the Company. The remuneration of the key management personnel is as follows:

	2016	2015
Payments to key management personnel:		
Cash compensation	\$ 243,825	\$ 190,996
Share-based payments	805,948	33,498

During the period ended December 31, 2016, the Company paid \$90,000 (2015 - \$90,000) in rent to Cabrera Capital Corp. ("Cabrera"), a company controlled by a director of the Company. As at December 31, 2016, the Company had a payable of \$32,931 (June 30, 2016 - \$240,530) due to Cabrera.

During the period ended December 31, 2016, the Company paid professionals services fees of \$20,893 (2015 - \$17,192) to a management services company owned by a director of the Company's subsidiary.

During the period ended December 31, 2016, the Company paid directors' fees of \$8,000 (2015 - \$12,000) to non-executive board members.

As at December 31, 2016, the Company has a payable of \$5,997 (June 30, 2016 - \$689,101) due to Red Lion Management Ltd., a company controlled by a director of the Company, for expenses incurred on behalf of the Company. Accounts payable due to related parties are unsecured, non-interest bearing, have no fixed repayment terms, and are due on demand.

CRITICAL ACCOUNTING ESTIMATES

The Company's accounting policies are described in notes 2 and 3 of its consolidated financial statements for the year ended June 30, 2016. The preparation of the consolidated financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported expenses during the period. Actual results could differ from these estimates. Management considers the following estimates to be the most critical in understanding the judgments and estimates that are involved in the preparation of the Company's consolidated financial statements and the uncertainties that could impact the results of operations, financial condition and cash flows:

Functional currency

The functional currency of each of the subsidiaries and the Company were assessed to determine the economic substance of the currency in which each entity performed its operations. The functional currency of the Company is the Canadian dollar. The functional currencies of the Company's subsidiaries have been assessed and incorporate the Canadian dollar, Fijian dollar and Australian dollar as detailed in Note 2 of the condensed consolidated interim financial statements for the period ended December 31, 2016.

Exploration and evaluation assets

The carrying value and recoverability of exploration and evaluation assets requires management to make certain estimates, judgments and assumptions about its projects. Management considers the economics of the project, including the latest resource prices and the long-term forecasts, and the overall economic viability of the project. The user is advised to refer to the risks of the Company discussed in the Annual Information Form for the year ended June 30, 2016 which discuss factors that could impair the Company's ability to develop its exploration and evaluation assets in the future.

Income taxes

The determination of income tax is inherently complex and requires making certain estimates and assumptions about future events. While income tax filings are subject to audits and reassessments, the Company has adequately provided for all income tax obligations. However, changes in facts and circumstances as a result of income tax audits, reassessments, jurisprudence and any new legislation may result in an increase or decrease in the Company's provision for income taxes.

Equity measurements

Share-based payments are subject to estimation of the value of the award at the date of grant using pricing models such as the Black-Scholes option valuation model. The option valuation model requires the input of highly subjective assumptions including the expected share price volatility.

New standards not yet adopted

IFRS 9 Financial Instruments (Revised)

IFRS 9 was issued by the IASB in October 2010. It incorporates revised requirements for the classification and measurement of financial liabilities and carrying over the existing derecognition requirements from IAS 39 *Financial instruments: recognition and measurement*. The revised financial liability provisions maintain the existing amortized cost measurement basis for most liabilities. New requirements apply where an entity chooses to measure a liability at fair value through profit or loss – in these cases, the portion of the change in fair value related to changes in the entity's own credit risk is presented in other comprehensive income rather than within profit or loss. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. The impact of IFRS 9 on the Company's financial instruments has not yet been determined.

IFRS 16 Leases

IFRS 16 is a new standard that sets out the principles for recognition, measurement, presentation, and disclosure of leases including guidance for both parties to a contract, the lessee and the lessor. The new standard eliminates the classification of leases as either operating or finance leases as is required by IAS 17 and instead introduces a single lessee accounting model. IFRS 16 is effective for annual periods beginning on or after January 1, 2019. The impact of IFRS 16 on the Company's leases has not yet been determined.

FINANCIAL INSTRUMENTS AND OTHER INSTRUMENTS

Financial instruments of the Company comprise cash, restricted cash, receivables, deposits, and accounts payable and accrued liabilities. The carrying values of these financial instruments do not materially differ from their fair values due to their ability for prompt liquidation or their short terms to maturity.

Credit risk

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its liquid financial assets including cash and receivables. The Company limits exposure to credit risk on liquid financial assets through maintaining its cash with high-credit quality financial institutions.

Receivables mainly consist of government sales tax ("GST") receivable from the Government of Canada, GST receivable from the Government of Australia, and value added tax receivable from the Government of Fiji. The Company has not had issues with respect to collectability of these amounts and believes that the credit risk concentration with respect to receivables is minimal.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at December 31, 2016, the Company had working capital of \$33,019,877 and believes it has adequate financing for the next twelve months.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. The Company does not have a practice of trading derivatives.

a) Interest rate risk

The Company's financial assets exposed to interest rate risk consist of cash. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. Management believes the interest rate risk is low given the current low global interest rate environment.

b) Foreign currency risk

The Company's property exploration work occurs in Fiji and Australia and is conducted in Canadian dollars, Australian dollars and Fijian dollars. As such, the Company is exposed to foreign currency risk in fluctuations among these currencies. Fluctuations in the exchange rate among the Canadian dollar, Australian dollar and Fijian dollar may have a material adverse effect on the Company's business and financial condition.

As at December 31, 2016, the Company's net foreign denominated financial assets are as follows:

	Foreign currency		Canadian dollar equivalent	
Australian Dollar	\$	(136,447)	\$	(132,449)
Fijian Dollar		3,124,556		1,961,284

The sensitivity of the Company's comprehensive loss due to changes in the carrying values of monetary assets and liabilities denominated in foreign currencies is as follows.

Increase / decrease in foreign exchange rate	December 31, 2016		June 30, 2016
+ 5%	\$	91,442	\$ 90,530
- 5%		(91,442)	(90,530)

c) Price risk

The Company is exposed to price risk with respect to commodity and equity prices. The Company closely monitors commodity prices to determine the appropriate strategic action to be taken by the Company.

RISK FACTORS

Prior to making an investment decision investors should consider the investment risks set out in the Annual Information Form ("AIF"), located on SEDAR at www.sedar.com, which are in addition to the usual risks associated with an investment in a business at an early stage of development. The directors of the Company consider the risks set out in the AIF to be the most significant to potential investors in the Company, but are not all of the risks associated with an investment in securities of the Company. If any of these risks materialize into actual events or circumstances or other possible additional risks and uncertainties of which the Directors are currently unaware, or which they consider not to be material in relation to the Company's business, actually occur, the Company's assets, liabilities, financial condition, results of operations (including future results of operations), business and business prospects, are likely to be materially and adversely affected. In such circumstances, the price of the Company's securities could decline and investors may lose all or part of their investment.

INTERNAL CONTROLS OVER FINANCIAL REPORTING

Disclosure Controls and Procedures ("DC&P")

The Company has established disclosure controls and procedures to ensure that information disclosed in this MD & A and the related condensed consolidated interim financial statements was properly recorded, processed, summarized and reported to the Company's Board and Audit Committee. The Company's certifying officers conducted or caused to be conducted under their supervision an evaluation of the disclosure controls and procedures as required under Canadian Securities Administration regulations, as at December 31, 2016. Based on the evaluation, the Company's certifying officers concluded that the disclosure controls and procedures were effective to provide a reasonable level of assurance that information required to be disclosed by the Company in its annual filings and other reports that it files or submits under Canadian securities legislation is recorded, processed, summarized and reported within the time period specified and that such information is accumulated and communicated to the Company's management, including the certifying officers, as appropriate to allow for timely decisions regarding required disclosure.

It should be noted that while the Company's certifying officers believe that the Company's disclosure controls and procedures provide a reasonable level of assurance and that they are effective, they do not expect that the disclosure controls and procedures will prevent all errors and fraud. A control system, no matter how well conceived or operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met.

Internal Control over Financial Reporting ("ICFR")

The Company's certifying officers acknowledge that they are responsible for designing internal controls over financial reporting, or causing them to be designed under their supervision in order to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS.

Mr. Stephen Mann, a director of the Company has been appointed to serve on the Audit Committee. Mr. Mann is financially literate but is not independent pursuant to the definitions provided by NI 52-110. The Nominating Committee is currently working to identify and appoint an appropriate candidate to the Board and to serve as an independent member of the Audit Committee, and who will be an asset to all functions of the Board. In the interim, the Board considers that Mr. Mann will be able to provide financial oversight. The Audit Committee is comprised of a majority of independent members and has the financial literacy, as a whole, required to provide adequate oversight of the ICFR and financial reporting of the Company. The Audit Committee, with management, has evaluated the change to the ICFR and considers the lack of a third independent member to be a "significant deficiency" in accordance with the definition provided by COSO. This is, therefore, a deficiency less severe than a material weakness yet important enough to merit attention by the Board.

Limitations of Controls and Procedures

The Company's management, including the Chief Executive Officer and Chief Financial Officer, believe that any disclosure controls and procedures or internal controls over financial reporting, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, they cannot provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been prevented or detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by unauthorized override of the control. The design of any systems of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Accordingly, because of the inherent limitations in a cost effective control system, misstatements due to error or fraud may occur and not be detected.

INFORMATION REGARDING FORWARD LOOKING STATEMENTS

This Management's Discussion and Analysis of Financial Condition and Results of Operations contain certain forward-looking statements. Forward-looking statements include but are not limited to the timing and amount of estimated future production, costs of production, capital expenditures, costs and timing of the development of new deposits, success of exploration activities, permitting time lines, currency fluctuations, requirements for additional capital, environmental risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage and the timing and possible outcome of pending litigation. In certain cases, forward-looking statements can be identified by the use of words such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes" or variations of such words and phrases, or statements that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such risks and uncertainties include, among others, the actual results of current exploration activities, conclusions or economic evaluations, changes in project parameters as plans continue to be refined, possible variations in grade and or recovery rates, failure of plant, equipment or processes to operate as anticipated, accidents, labour disputes or other risks of the mining industry, delays in obtaining government approvals or financing or incompleteness of development or construction activities, risks relating to the integration of acquisitions, to international operations, and to the prices of gold and other metals. While the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. The Company expressly disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise except as required by law.
